VIA Patrick Griffith, Westminster, Colorado

This web site has info about the EC-130E Commando Solo / Rivet Rider configured aircraft operated by the 193rd Special Ops Wing of the PA ANG. These are the psy-ops guys that broadcast on AM, FM, TV, and

military channels to encourage the enemy to surrender. There is mention of a retractable wire antenna that extends from the belly and is held vertical by a 500 pound weight! Since these guys have participated in every major conflict in recent history I was wondering if anyone on this list had ever received their AM broadcasts? Of course to be effective the broadcasts would need to be in the native language of the enemy forces.

FEDERAL STANDARDS GLOSSARY OF TELECOMMUNICATIONS TERMS

http://www.its.bldrdoc.gov/fs-1037/

Whether you need to know what AWGN stands for (additive white gaussian noise, a/k/a white noise) or what zero-bit insertion means, this site can fill the bill. What you're looking at here is the hypertext version of the "Federal Standard 1037C, Glossary of Telecommunication Terms, 1996." You can scan the glossary by letter (A-Z), use the search engine, the index (organized by well thought out categories), or

study a list of abbreviations and acronyms. This is one of the most comprehensive glossaries we've run across on the Internet. Not only that, this Web page went to charm school; its date/time stamp says things like, "Good morning." Hi, WRU?

RUNE'S BARF BAG COLLECTION

http://www.sicksack.com/

VIA Yahoo Weekly Picks, October 29, 2001

This is the most sickening, gut-wrenching site we've ever seen. Conveniently split up by continent, the universal language of, uh, vomit, is gloriously

displayed through an extensive collection of airsickness bags from airlines throughout the world. From Africa to Australia, the industry isn't pulling any punches in attracting your nasty business. Be it colorful or plain, robust or flimsy, the site presents accurate scans of "barf bags" and explains their dimensions and eye-catching appearance. We were happy to see that Air 2000, a UK-based charter, even included the instructions: "Leave bag on seat" it joyfully explains. Fasten your seatbelts, this could be a very yucky flight.

THE PHOBIA LIST

http://www.phobialist.com

VIA Elmer Standish, Courtenay, BC

Everyone's afraid of something, and thanks to The Phobia List you can now put a name to whatever it is that spooks you. The next time you feel like staying home from school or work, maybe you can claim to have suddenly developed a severe case of Kathisophobia (the fear of sitting down), which would prevent you from sitting at your desk all day.
